PORTFOLIO

PROFESSIONAL SUMMARY

Junior Software Engineer with 2+ years of experience developing and maintaining production web applications using React.js, JavaScript, TypeScript, Node.js, Express.js, and MongoDB. Experienced in building reusable React components, integrating REST APIs, implementing JWT authentication, authorization and RBAC, and developing business workflows across logistics, e-commerce, recruitment, and healthcare domains. Hands-on experience with Redux Toolkit, Context API, GitLab CI/CD, API integration, performance optimization, and Agile development.

PROFESSIONAL EXPERIENCE

Junior Software Engineer, Code Factory Global Softwares, Pune

May 2024 – Present

- Developed and maintained **5+ production web applications** across logistics, e-commerce, vehicle rental, and recruitment domains, integrating **REST APIs** for core business workflows.
- Built reusable **React.js components** using **Redux Toolkit** and **Context API**, and contributed to a **Storybook**-based UI library with documented reusable components.
- Implemented **JWT-based Authentication, Authorization, and Role-Based Access Control (RBAC)**, along with CRUD operations, search, filtering, pagination, and sortable data tables.
- Developed a **shipment tracking workflow** for a merchant application by integrating logistics APIs to display shipment status, tracking history, and delivery updates.
- Optimized React application performance using **lazy loading, component memoization, request caching**, and efficient state management to reduce unnecessary API requests and re-renders.
- Diagnosed and resolved production issues by debugging **React applications**, validating APIs using **Postman**, and collaborating with QA teams to improve application stability.
- Contributed to **GitLab CI/CD** workflows for build and deployment across development, staging, and production environments.
- Developed payment workflows for the **B&B Edutech** project using **Connect IPS**, including partial payment functionality and transaction/payment status tracking.
- Improved recruitment platform onboarding workflows and resolved usability issues to enhance the overall candidate experience.

Frontend Engineer Intern, Pecs IT Solutions (Remote)

Jan 2024 – Apr 2024

- Developed frontend features for a **multi-tenant SaaS platform** using **React 19, TypeScript, and Redux Toolkit** for factory safety inspections and compliance reporting.
- Built feature modules using **reusable React components**, centralized state management, persisted Redux state, and responsive UI workflows.
- Developed an **offline-capable Progressive Web App (PWA)** for tablet-based field inspections in low-connectivity environments.
- Engineered a **schema-driven dynamic form system** using JSON configurations to render statutory **Forms 11, 13, and 9B**.
- Implemented workflows for **inspection management, compliance reporting, dashboards, form submission, validation, and report generation**.
- Integrated React applications with **REST APIs** for authentication, authorization, inspection data, subscriptions, and reporting workflows.
- Collaborated with backend services built using **Node.js and Express.js**, gaining practical experience in API integration and full-stack application development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java

Frontend: React.js, Redux Toolkit, React Hooks, Context API, React Router, Axios, HTML, CSS, Bootstrap, Tailwind CSS, Storybook

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Cloud & Deployment: AWS, Render

Tools & DevOps: Git, GitHub, GitLab, GitLab CI/CD, npm, Vite, Postman

Software Engineering: RBAC, Authentication & Authorization, CRUD Operations, MVC, Component-Based Architecture, Agile, Scrum

KEY PROJECTS

QuickDoc – Doctor Appointment Booking Application

- Developed a full-stack **Doctor Appointment Booking** application with real-time appointment scheduling using **React, Redux Toolkit, Node.js, Express.js, MongoDB**, and **Ant Design**.
- Built secure **RESTful APIs** for appointment management, doctor and patient records, and authentication.
- Managed complex application state using **Redux Toolkit** and integrated **MongoDB** for efficient and persistent data storage.
- Designed a responsive and user-friendly interface, delivering a seamless experience across desktop and mobile devices.
- Deployed the application on **Render**, enabling cloud-based accessibility and continuous availability.
- **Technologies:** React, Redux Toolkit, React Router, Node.js, Express.js, MongoDB, Ant Design, Render

BuyBuddy – E-Commerce Platform

- Developed a responsive **E-Commerce** web application using **React** and **Styled Components**.
- Implemented product browsing, shopping cart functionality, and local storage-based state persistence for an enhanced shopping experience.
- Designed an intuitive and responsive user interface to provide a seamless experience across desktop and mobile devices.
- Optimized component reusability and application performance using modern React development practices.
- **Technologies:** React, Styled Components, JavaScript, HTML5, CSS3, Local Storage

EDUCATION

Priyadarshini College of Engineering, Nagpur — B.E. (Information Technology)

- CGPA: 8.47 | 12th: 62.67% | 10th: 80.80%
